GNSO Report

- Nearly completed "Comments in Response to the ccNSO-GAC Issues Report on IDN names"
  - 1 issue left regarding avoidance of "confusing similarity"
- Began deliberations on Domain Name Tasting PDP
- Discussed initial reactions to GNSO Improvements report
- Participated in informative discussion with ccNSO Council on IDN TLDs
- Had difficulty with full participation since several council members could not afford to attend and remote facilities did not work well, despite the valiant efforts of technical support staff
