Next-Generation gTLD Registration Directory Services to Replace Whois

Created by Brian, last modified by Lisa Phifer on Jan 14, 2016 Translate

Welcome to the Next-Generation gTLD Registration Directory Services to Replace WHOIS workspace.

This Policy Development Process (PDP) was initiated by the ICANN Board on 8 November 2012 when it launched an Expert Working Group on gTLD Registration Directory Services (EWG) to (1) help redefine the purpose of gTLD registration data and consider how to safeguard the data, and (2) propose a model for gTLD registration directory services to address accuracy, privacy, and access issues.

Upon publication of the EWG's Final Report in 2014, an informal group of GNSO Councilors and ICANN Board members collaborated to propose a Process Framework for structuring this PDP. On 26 May 2015, the ICANN Board adopted that Process Framework and reaffirmed its request for a Board-initiated PDP, using the recommendations in the EWG's Final Report as an input to, and, if appropriate, as the foundation for a new gTLD policy. Both Preliminary and Final Issue Reports for this PDP were published for public comment in 2015.

On 19 November 2015, the GNSO Council approved a Charter for the Next-Generation gTLD Registration Directory Service (RDS) to replace WHOIS (Next-Gen RDS) Policy Development Process (PDP) Working Group.

A call for volunteers to join this PDP WG was initiated on 4 January 2016:

If you are interested in joining the WG as an individual participant or mailing list observer, please fill in the sign up form or send the Word document [DOCX, 72 KB] **filled in to the GNSO Secretariat.** When this WG convenes, all members and observers will be listed on the WG Members page.

Working Group Mailing lists

Two different mailing lists

⊙ Gnso-rds-pdp-wg@icann.org: Discussion mailing list. Accessible to reading by observers and members. Only members can post to it. Call details must NOT be sent here.

⊙ Ntfy-rds-pdp-wg@icann.org: Dial in information diffusion list. Accessible to reading by members. Only staff support can post to it.

If you wish to change your status to observer or member, please email the GNSO Support staff: gnso-secs@icann.org

Mailing list etiquette

⊙ Subject line should be clear. This makes it easier for members to search and respond to the thread.

⊙ Remember to sign with your full name

⊙ Be mindful of inbox overload

⊙ When quoting a previous email, copy selected passage only, not the entire email

⊙ Message to the entire list should only be sent when it contains information that is beneficial to everyone. Messages such as "thanks for the information" or me too" should be sent to individuals rather than the entire list.

⊙ Administrative messages such as dial out requests, apologies or Statement of Interest issues should not be sent to the entire list

⊙ Do not hesitate to ask questions or comments!

- ⦿ Adobe Connect room protocol in the GNSO
  - ⦿ Hand raised
  - ⦿ Approval/ Objection
  - ⦿ ICANN Expected Standards of Behaviour

Act in accordance with ICANN's Bylaws. In particular, participants undertake to act within the mission of ICANN and in the spirit of the values contained in the Bylaws.

Adhere to ICANN's conflict of interest policies.

Facilitate transparency and openness when participating in policy development and decision-making processes.

Conduct yourself in accordance with ICANN policies.

Work to build consensus with other stakeholders in order to find solutions to the issues that fall within the areas of ICANN's responsibility. The ICANN model is based on a bottom-up, consensus driven approach to policy development. Those who take part in the ICANN process must take responsibility for ensuring the success of the model by trying to build consensus with other participants.

Act in a reasonable, objective and informed manner when participating in policy development and decision-making processes. This includes regularly attending all scheduled meetings and acting in the best interest of Internet community, irrespective of personal interests and the interests of the entity to which an individual might owe their appointment.

Protect the organization's assets and ensure their efficient and effective use.

Act fairly and in good faith with other participants in the ICANN process.

Listen to the views of all stakeholders when considering policy issues. ICANN is a unique multi-stakeholder environment. Those who take part in the ICANN process must acknowledge the importance of all stakeholders and seek to understand their points of view.

Treat all members of the ICANN community equally, irrespective of nationality, gender, racial or ethnic origin, religion or beliefs, disability, age, or sexual orientation; members of the ICANN community should treat each other with civility both face to face and online.

Promote ethical and responsible behavior. Ethics and integrity are essential, and ICANN expects all stakeholders to behave in a responsible and principled way.
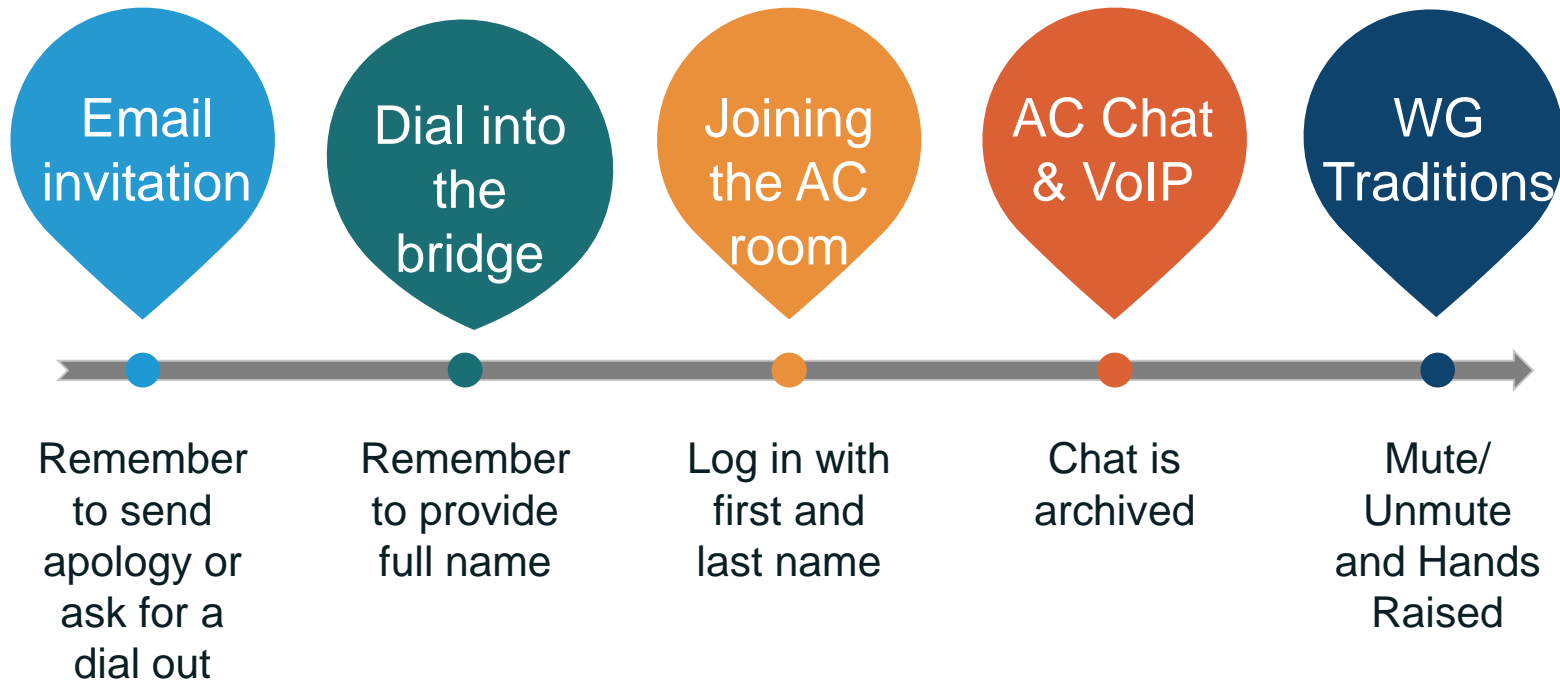

Support the maintenance of robust mechanisms for public input, accountability, and transparency so as to ensure that policy development and decision-making processes will reflect the public interest and be accountable to all stakeholders.
