Professional Experience:

GoDaddy.com, Inc. (Scottsdale, AZ)

2009 – Present: Director of Policy Planning

Represent GoDaddy.com and GNSO registrars in the ICANN Community and on numerous working groups, drafting teams, PDPs, and Advisory Groups. These teams examine Registration Abuse, Transfers, Fast-Flux Hosting, WHOIS and other issues. Liaise with ccTLD authorities and coordinate registrar operations. Registrar representative on Registry Infrastructure Security Group (RISG), a non-profit industry association focused on DNS security.

GoDaddy.com, Inc. (Scottsdale, AZ)

2007 – 2009: Development Team Lead

Led team of five application and database developers in the design of prototype provision and DNS systems. Created a scalable web and port 43 WHOIS query system with dynamic policy masking for use in a shared TLD environment.

RK Dixon Company, Inc. (Davenport, IA)

2004 – 2007: IT Consulting Manager

Primary individual responsible for Operations within an IT Consulting and Managed Services firm. Directly responsible for leading a multi-disciplined team of Software / Infrastructure Engineers and Business Process Consultants in the execution of strategic engagements in Iowa, Illinois and Indiana. Define and develop service offering, best practices, and compliance efforts for medium-large enterprise clients in healthcare, finance, manufacturing and government. Managed key strategic vendor relationships.

Crystal Group, Inc. (Hiawatha, IA)

1997 – 2004: Director of Technical Services

Managed technology teams for a manufacturer and integrator of telecommunications, Internet and military communications systems. Responsible for process design and documentation in an ISO-compliant environment. Managed vendor and supplier networks, and coordinated product development roadmaps to meet customer needs and track technological trends. Represented the company in two industry associations and standards bodies (MSPA and PICMG).

AgRisk Insurance (Iowa City, IA)

1996 – 1997: IT / Database

Developed and deployed online electronic policy management and claims processing / reporting system. Established Internet presence for small offices, and automated key internal data collection and reporting functions.

Various other volunteer and local community activities.
