

# Amsterdam

Registry/Registrar Meeting

## Automating Registrar Onboarding

# What is AROS?

- **Automated Registrar Onboarding System**
  - Replacing the current paper/fax based accreditation system
  - Automating what can be automated
  - Providing a better user experience
  - **Improving scalability**

# What Has Gone Before

- 3Q2011 Survey
  - Should onboarding be automated?
    - YES
- 4Q2012 Survey
  - What should automated onboarding include?
    - Not just accreditation but also data management
- Creation of a consultative/working group
- Hired JAS Global Advisors to develop Requirements Document
  - Analysis of Survey documents completed
  - First pass at User Requirement document completed

# Consultative Working Group

- Roy Dykes
- Barbara Knight
- Michele Neylon
- Rob Golding
- Tobias Satter
- Benny Samuelson
- Karla Valente
- Wendy Profit
- Mike Zupke
- Simon Raveh
- David Conrad (JAS)

# Requirement Highlights

- Browser based UI
- RESTful APIs
- Administrator and Operator Users
  - Registrar and Registry Operators
  - Sub-operators
- Contact information
- Optional “Click-through” Accreditation
- Integration with RADAR
- Single data image
- Document up/download
- Form data up/download
- Extensive audit logs

# Next Steps

- Request input on User Requirements from the Registrar and Registry community
- Derive Functional Requirements with the help of ICANN Staff (Simon Raveh and team)
  - Estimated completion: End of February
- Provide input to ICANN Management to help with Buy vs. Build decisions

# Questions?

Thank You
