

## GNSO POLICY DEVELOPMENT UPDATE

ISSUE: ‘Thick’ WHOIS Policy Development Process

UPCOMING IMPORTANT DATES: Implementation Review Team meetings occur regularly. Preliminary findings of the Legal Review of laws applicable to the transition of data from thin to thick WHOIS models to uncover potential privacy issues, if any, were shared with the IRT during the November meeting. At the ICANN 53 meeting an update on status of the legal review is expected to be provided. In the meantime, the IRT will focus on the other recommendation of Consistent Labeling and Display (CL&D) of WHOIS data.

### SUMMARY

ICANN specifies WHOIS service requirements through its agreements with gTLD Registries and Registrars. Registries have historically satisfied their WHOIS obligations under two different models, characterized as “thin” and “thick” WHOIS registries. In a thin registration model the Registry only collects and publishes the minimal information associated with the domain name from the Registrar (such as DNS technical information). All of the registrant’s contact information is maintained by the Registrar, which publishes it via their own WHOIS services. In a thick registration model the Registry collects both sets of data (domain name and registrant) from the Registrar and in turn publishes that data via WHOIS. The Council initiated a Policy Development Process (PDP) to consider a possible requirement of "thick" WHOIS for all gTLDs. This issue is one that also affects access to WHOIS data, which is a law-enforcement-related issue. The GAC has indicated its interest in both WHOIS and law enforcement-related issues in previous GAC Communiqués. The Thick WHOIS WG finalized its report and submitted it to the GNSO Council on 21 October 2013. The GNSO Council unanimously adopted the recommendation to require Thick WHOIS for all gTLD registries at its meeting on 31 October 2013. Following the public comment forum and the notification of the GAC, the ICANN Board considered the recommendations and [adopted](#) these at its meeting on 7 February 2014.

### GAC ENGAGEMENT OPPORTUNITY STATUS

Following the adoption of the recommendations by the ICANN Board, an Implementation Review Team has been formed to work with ICANN staff on the development of the implementation plan. The proposed implementation and policy language will eventually be published for public comment.
