

Early Engagement Policy Document - Translation and Transliteration

Policy Development Process (PDP) Update Translation and Transliteration Of Contact Information (T/T)

December 2016

UPCOMING IMPORTANT DATES

The Implementation Review Team (IRT) is currently discussing issues surrounding implementation of language and script tags as recommended in the T/T final report. Due to emerging complexities surrounding implementation of language and script tags, the implementation's projected effective date has been extended into 2018. Global Domains Division (GDD) staff continues to iteratively draft policy language to discuss with the IRT.

SUMMARY

The Policy Development Process (PDP) on the translation and transliteration had its inaugural meeting on 19 December 2013. It focused its work the following issues:

1. Whether it is desirable to translate contact information to a single common language or transliterate contact information to a single common script.
2. Who should decide which party(s) should bear the burden of translating contact information to a single common language or transliterating contact information to a single common script.

The Working Group completed its [Final Report](#), which was [approved](#) by the GNSO Council on 24 June. In its Final Report, the Working Group does not recommend to mandate the translation/transliteration of contact information data. Instead the Group recommends that registrants are able to submit contact data in any language/script supported by their registrar; ideally the registrant's native one. The Group expressed in its Final Report that data submitted in a script native to the registrant is most likely to be accurate and that the costs of translating and/or transliterating all contact information data would be disproportionate to any potential benefits. On 28 September, the ICANN Board [adopted the recommendations](#).

ENGAGEMENT OPPORTUNITY STATUS

Staff has formed an Implementation Review Team and held a kickoff call on 19 July. The GNSO Council has yet to appoint a liaison to the GNSO.
