DRAFT Response - GNSO Council GNSO3 Review Response

Dear Maarten,

The GNSO Council appreciates your [outreach](#) regarding the potential impact of Third Accountability and Transparency Review Team (ATRT3) Final Report on the timing of the next GNSO Review. While the GNSO Council is providing its input as part of the GNSO community, it fully anticipates that the Stakeholder Groups and Constituencies may have or will be providing their own feedback that should be considered separately and independently. This Council's response centers on its primary remit as the manager of the policy development process of the GNSO.

The GNSO Council believes that it is appropriate to pause the GNSO3 Review and the required planning steps, given the potential impact of the recommendations from ATRT3. The Council has a full slate of policy development work underway now and planned for the near future and as such, believes that any review of the GNSO should be cognizant of resource limitations and seek to gain efficiencies with other related efforts. The Council understands that the ATRT3 recommendations were adopted by the ICANN Board during its special meeting held on 30 November 2020 and welcomes greater understanding of what the Holistic Review and Continuous Improvement program will look like in practice; to that extent, the Council stands by to assist in planning work where its input may prove useful.

As a final note, the GNSO Council is continuously looking to improve in its role as the manager of the policy development process, as evidenced by recent work on PDP 3.0. The Council is committed to a culture of continuous improvement that will hopefully provide synergies with the implementation of the ATRT3 recommendations.

We hope that the Board finds the GNSO Council's response and input helpful.

Best regards,

Philippe Fouquart
GNSO Chair
