[Sheet Protect PW: GNSO]

To Add New Motion Types:

\*\*In general, you want to make all changes to the tab of Motion 1, and then once validated the changes work as designed, the entire sheet can just be copy/pasted across the other motion # tabs to propagate the change.

1) Add the formal motion type name to the drop\_down tab. Make sure entries are within the bounds of the Data Validation attribute on cell C4 of Motion 1 tab. Verify that you can see the new motion types available in the drop down menu

2) Update the rules table on M3:

\*\*\* Note that the logic columns of N&O are hidden so they are not printed to PDF. Unhide those, and be sure to hide them again after validation.

- It is best to copy paste/insert of an existing rule that matches the same threshold as the new motion type. This will expedite the update required for the new motion type logic.

- Replace the name of the motion type in cell M(x) with that of the motion type name.

- Update the Conditional Formatting of the same cell M(x) with that of the motion type name.

- Update cell N(x) with that of the motion type name.

- Update the Conditional Formatting on cells C31 & C32 to correspond to each motion type.

\*\*\* Remember, in some cases, two rows will have to be used on motions that contain -OR- conditions
