

3 August 2021

**Appointment of Board and ICANN org liaison to GNSO Registration Data Accuracy Scoping Team**

Dear Maarten and Goran,

I am following up on our discussion during the Board – GNSO Council meeting in relation to the Registration Data Accuracy Scoping Team. As discussed, the GNSO Council would welcome the participation of a liaison from the ICANN Board as well as ICANN org in this effort.

As you may be aware, the Council formally adopted the formation of and instructions to the Accuracy Scoping Team during its meeting on 22 July 2021 (see <https://gns0.icann.org/sites/default/files/file/field-file-attach/registration-data-accuracy-scoping-team-formation-instructions-09jul21-en.pdf> [[gns0.icann.org](https://gns0.icann.org)]). As a result, I am now reaching out to you to ask you confirm your interest in participating, and if so, to confirm your liaison to this effort. For your information, the composition of the scoping team is as follows:

Each interested Supporting Organization, Advisory Committee, GNSO Constituency and Stakeholder Group	Up to two members
Registrar Stakeholder Group	Up to three members
Registry Stakeholder Group	Up to three members
ICANN Org	1 Liaison
ICANN Board	1 Liaison

As you consider which liaison to assign to this effort, I would encourage you to review the [instructions](#) to the Scoping Team.

As a reminder, this effort is about scoping the issue and identifying potential follow up work – it is not about developing policy recommendations.

Please note that although the work of the scoping team is not expected to commence its work until the EPDP Phase 2A delivers its Final Report to the GNSO Council (currently scheduled for end of August 2021), we would like to request you to confirm your liaison by 25 August at the latest so that the group can hopefully make a running start. In the meantime, the Council will also start a search for a Chair for this effort so please look out for that announcement as well.

Best regards,

Philippe Fouquart  
GNSO Chair
