
Implementation Status: Registration Data Policy for gTLDs (Expedited Policy Development Process Phase 1 Implementation)

WHAT CAN I EXPECT AT ICANN65 IN RELATION TO THIS TOPIC?

The Implementation Review Team (IRT) will conduct a working session to plan for the stage 2 policy at ICANN65.

WHAT IS THIS ABOUT?

Pursuant to the procedures for the establishment of temporary policies in ICANN's agreements with registry operators and registrars, the ICANN Board adopted the **Temporary Specification for Generic Top-Level Domain (gTLD) Registration Data** on 17 May 2018. The Temporary Specification provides modifications to existing requirements in the Registrar Accreditation Agreement (RAA) and Registry Agreement (RA) in order to comply with the European Union's General Data Protection Regulation (GDPR). From its effective date of 25 May 2018, the Temporary Specification can only remain in force for up to one year and will expire on 20 May 2019.

On 19 July 2018, the GNSO Council initiated an Expedited Policy Development Process (EPDP) on the Temporary Specification for gTLD Registration Data and chartered the EPDP Team.

On 4 March 2019, the GNSO Council adopted the EPDP Team's Phase 1 Final Report and submitted it to the Board for their consideration. The Board has conducted a Public Comment and passed a resolution on 15 May 2019 to authorize the implementation of most of the EPDP Phase 1 recommendations, except for parts of two recommendations.

Working in advance of the Board resolution, the IRT produced the concept of three stages of the policy implementation.

- Stage 1: Effective 20 May 2019, contracted parties must continue to implement measures consistent with the Temporary Specification for gTLD Registration Data, as adopted by the Board on 17 May 2018.

PHASE 1 IMPLEMENTATION

- Stage 2: This stage will begin after the ICANN organization publishes a Registration Data Policy as a Consensus Policy and formally notifies the contracted parties. During this stage, contracted parties may implement the Interim Policy, the Registration Data Policy, or elements of both as they prepare for the effective date of the Registration Data Policy. The timing of this milestone is to be determined.
- Stage 3: Contracted parties must comply with the Registration Data Policy as of its effective date, which the EPDP Team recommended to be 29 February 2020.

The Stage 1 interim Consensus Policy named **Interim Registration Data Policy for gTLDs** was published on 17 May 2019.

WHY IS THIS IMPORTANT?

The Temporary Specification provides modifications to existing requirements in the RAA and RA in order to comply with GDPR. The recommendations from the EPDP Team provides community consensus views on the requirements that are now needed to be implemented as a consensus policy.

WHAT IS THE CURRENT STATUS OF THIS PROJECT?

On 17 May 2019, ICANN announced the **Interim Registration Data Policy for gTLDs** which gTLD registries and registrars are required to implement by 20 May 2019. This interim Consensus Policy requires that contracted parties continue to implement measures consistent with the **Temporary Specification for gTLD Registration Data**, which expired on 20 May 2019. This is considered the Stage 1 interim Consensus Policy.

WHAT ARE THE EXPECTED NEXT STEPS?

The ICANN Board accepted 27 of the 29 recommendations included in the EPDP Team's Phase 1 Final Report. Of the two recommendations not adopted in full, the Board identified portions of the recommendations that require further consultation with the GNSO. The IRT is in the process of analyzing all recommendations to define the requirements in detail. When the implementation plan is produced, it will be published for Public Comment.

HOW CAN I GET INVOLVED?

One can join the IRT by following the instruction in the “[call for IRT](#)” announcement. The first IRT meeting was held on 29 May 2019. The IRT is expected to meet every other week via teleconference and in person at ICANN Public Meetings.

One can also choose to become an observer of the IRT mailing list on a read-only basis. The names of IRT mailing list observers are published on the [IRT Workspace](#).
