

Internationalized Registration Data Working Group Final Report Recommendations

- **SSAC recommends:** Development of data model for domain name registration data
(See SAC054- a Domain Name Registration Data Model)
- **Joint SSAC/GNSO work proposal:** SSAC to work with GNSO Council on a request for common *Issue Report on translation and transliteration of contact information*
- **Protocol Development:** Staff & community to identify a Domain Name Registration Data Access Protocol that meets the needs of internationalization

IRD-WG Final Report Recommendations (Continued)

ICANN to take appropriate steps to

- Require gTLD registries/registrars and
- Persuade ccTLD registries/registrars

to support the following standards:

- **Domain Names** - both A-label and U-label; nameserver Names- A-label, and optionally U-label;
- **Telephone/fax**- ITU-T E.123; Email-RFC 6531; Registration Status- Exact EPP status where applicable; Date and time - in UTC as specified in [RFC3339], with no offset from the zero meridian.

Internationalized Registration Data Working Group Final Report - Next Steps

- On 27 June the GNSO Council passed a motion that:
 - Approved the delivery to the Board of the IRD-WG’s Final Report;
 - Requested staff to draft a joint letter from the GNSO and SSAC to the Board; and
 - Agreed to review the Report’s recommendations and advise the Board with regard to policy implications.
- In its Comments to the Board on the WHOIS Review Team Final Report (due 31 August) the SSAC will reinforce the IRD-WG Report’s recommendations.

Discussion on Next Steps
