## II. Group Member Types:

Group Member Type	Definition	Notes
<p>The following identifies the key roles and definitions used within the GNSO to address gTLD policy development or deliberate issues related to the DNS.</p> <p>[These profiles will be used for the online WG signup tool that will require logic definitions should a community member wish to upgrade or down grade their role for a given effort.] [This will also have a connection SOIs that will be attached to profiles]</p>		
Council Member	The terms “Council member,” Council representative,” and “Councilor” have the same meaning	
Chair	The purpose of a Chair is to call meetings, preside over working group deliberations, manage the process so that all participants have the opportunity to contribute, and report the results of the Working Group to the Chartering Organization.	See the GNSO Working Group Guidelines for additional details
Co-Chair	Co-Chairs can be appointed to better facilitate the issue being addressed or policy development exercise. A Co-Chair has the same authority and role as single Chair, only that it is a shared responsibility.	See the GNSO Working Group Guidelines for additional details
Vice-Chair	Vice-Chairs can be designated to support the Chair or Co-Chairs.	See the GNSO Working Group Guidelines for additional details

Member	The role of Members in GNSO Working Groups is defined in the GNSO’s Working Group Guidelines; for CWG/CCWGs, Members are nominated or designated by SO/AC Chartering Organizations to participate in the CWG/CCWG, with roles and responsibilities as may be specified in the CWG/CCWG Charter.	Further details may emerge from the expected recommendations from CWG-Principles

Unless excluded or otherwise specified in a WG/CWG/CCWG Charter, an Observer may voluntarily change his/her status to that of a Member at any time during the operations of that WG/CWG/CCWG.	Further details may emerge from the expected recommendations from CWG-Principles
Staff	ICANN staff assigned to support a particular WG/CWG/CCWG initiative or who otherwise performs a specific role within ICANN.
