

Mission versus WHOIS formulation

**Dr Bruce Tonkin
Chair, GNSO Council
Domain Name Marketplace Workshop
Marrakech, June 27, 2006**

ICANN mission

- **Coordinates the allocation and assignment of the three sets of unique identifiers for the Internet**
- **Coordinates policy development reasonably and appropriately related to these technical functions**

Formulation 1

- **provide information sufficient to contact a responsible party for a particular gTLD domain name who can resolve, or reliably pass on data to a party who can resolve, issues related to the configuration of the records associated with the domain name within a DNS nameserver.**
