

# **Mission versus WHOIS formulation**

**Dr Bruce Tonkin  
Chair, GNSO Council  
Domain Name Marketplace Workshop  
Marrakech, June 27, 2006**

# ICANN mission

- **Coordinates the allocation and assignment of the three sets of unique identifiers for the Internet**
- **Coordinates policy development reasonably and appropriately related to these technical functions**

# Formulation 1

- **provide information sufficient to contact a responsible party for a particular gTLD domain name who can resolve, or reliably pass on data to a party who can resolve, issues related to the configuration of the records associated with the domain name within a DNS nameserver.**
