

Statement for the record:

I would first like to thank Pam for working with me on this. The only thing to add which I have not already stated is I think that this unfortunately leaves some serious ambiguities with Rec 7. It is certainly not clear that this was intended to impact Thick Whois and that it leaves a gaping hole in what should be, what the team optional is and what the term required is. With that there is simply no way that the IPC could vote this.
