

Dear Councilors,

As reported at the last GNSO Council meeting, the Small Team has completed its review of the SubPro recommendations that the Board marked as “pending”. A large thanks to the Small Team for drafting the attached document which is the Small Team's output per the assignment form. The document captures the deliberations, assessments, and proposed paths forward for each of the relevant Board concerns. The Small Team’s output is intended to be the basis of the GNSO Council's Extraordinary Meeting on 04 May where the hope is that the Council reaches agreement on the proposed paths forward. Further, once the Council reaches agreement, it then needs to get aligned with the Board on the proposed paths forward. It will be important to have reviewed this in advance of the GNSO Council's Extraordinary Meeting.

Thank you again to the Small Team for its hard work.

John
