

# Urgent Requests: Short Recap + Gap

Status?

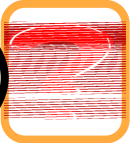

1

Timeline for Responding to Urgent Requests

2

Incorporating authentication into policy requirements **(nothing in writing)**

3

Community work on an authentication mechanism

# Urgent Requests: Path forward on Gap

## Options for handling lack of written reference to Authentication:

1

GNSO Council confirmation that **implementation** of the response timeline language incorporating the authentication mechanism would be consistent with Recommendation 18

2

Council incorporates the authentication mechanism as part of the work on **Supplemental Recommendations** for the EPDP Phase 2 Policy Recommendations

3

**Board un-adoption of Recommendation 18** and Council development of a Supplemental Recommendation integrating authentication and the response timeline language.
