

*I would like to point out that the conduct of this process was not optimal, nor was the communication between leadership, the Council, and the PDP members. I also hope that in the future we avoid having a non-confirmed PDP Chair managing sessions, and instead rely on Staff and the Council liaison to act in the interim.*

*i hope the Council can use this case as a learning process, and we get to remedy some of these issues in the next iteration of the DNS Abuse Mitigation PDP.*

Best,

--
